PROJECT SAMAD | PHASE 007 | 20 OCT 2026
LIQUID GLASS / IOS-INSPIRED EXPERIENCE

Branch: project-samad/phase-07-liquid-glass
Production: unchanged; draft implementation only.

SCOPE AND IMPLEMENTATION

1. Corrected brand statement to Business DNA. Engineering Mind.
2. Replaced the previous oversized WebGL visual in the homepage.
3. Added an original layered translucent CSS-3D glass composition.
4. Pointer orientation eases via requestAnimationFrame without React rerenders.
5. Prefers-reduced-motion and touch-pointer fallbacks implemented.
6. Added frosted navigation and refined translucent expertise cards.
7. Retained technology logo strip and non-confidential business narrative.

FILES

components/experience/LiquidGlassHero.tsx (new)
app/page.tsx (updated)
PROJECT_SAMAD.md (phase register updated)
docs/phase-reports/PHASE-007.pdf (this report)

VALIDATION AND LIMITATIONS

Source changes and GitHub commits recorded.
GitHub CI and preview verification: see latest run/PR status.
Motion appearance and FPS still require hands-on browser evaluation.
The new object uses CSS 3D, not Apple’s proprietary Liquid Glass API.
Historic public repository privacy/security considerations remain.

ROLLBACK

Do not merge branch; production main is unaffected.
Preview releases remain separate and protected by Vercel sign-in.
