PROJECT SAMAD | PHASE 002 | OCTOBER 19, 2026
RESPONSIVE EXPERIENCE AND BUSINESS POSITIONING

Status: Committed on isolated development branch; NOT deployed.
Branch: project-samad/phase-02-experience
Parent: Phase 001, 82fb0e48d77bb8259476a00a9a179a103cd629e1

Completed:
- Introduced mobile navigation with labeled open/close control.
- Repositioned navigation around expertise, selected work, operating approach, future ambition, and collaboration.
- Expanded business operations, strategy and leadership sections.
- Added accessible skip link and contact / collaboration actions.
- Removed legacy full-screen fluid canvas and floating vendor logos.
- Kept the initial pointer-reactive 3D hero prototype.
- Future consulting explicitly described as an ambition.

Files: app/page.tsx and Phase 002 tracking documents.

Validation: GitHub file update and code inspection succeeded.
Not run: TypeScript, lint, npm build, keyboard QA, mobile QA, visual/3D performance verification or production deployment.

Risks: Legacy scripts and repo assets require detailed privacy review.
Cinematic Three.js implementation remains unfinished.
Rollback: Do not merge or deploy this branch; keep main untouched.

NEXT: validated previews, accessibility, code cleanup, deeper 3D.
